

Dear Members of the Arizona Corporation Commission:

I suffer from asthma and chronic respiratory problems, and I am concerned! I know that energy efficiency plays a large part in improving air quality, so I am all for the current energy efficiency standard. I don't want to suffer any more when there is a solution.

I know there is an upfront cost when it comes to energy efficiency, but I believe it will be worth it in the end, and I would agree to pay that cost.

Thank you for your work on this matter.

Sincerely,

Clifton Wegener
